

KEY INVESTOR INFORMATION:

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Andurand Fund (the "Fund"), a sub-fund of Andurand UCITS ICAV (the "ICAV")

Class A USD (ISIN: IE00BYQB218) (the "Class")

Investment Objective and Policy

The investment objective of the Fund is to seek to achieve annualised returns which are uncorrelated to any particular sector or index.

The Fund will implement an energy related investment policy focused on commodities (such as oil, gasoline, natural gas and metals) and highly liquid investments such as currencies, cash and cash equivalents (for example certificates of deposit and treasury bills).

The Fund will gain exposure to commodities by investing in structured financial instruments ("SFI") which are debt securities that are listed on a regulated stock exchange. The FI seek to replicate the return of an alternative investment fund which pursues a commodity focused investment strategy. Investment in these SFI is limited to 20% of net assets of the Fund.

The Fund intends to maintain a significant (approximately 80% of net assets in normal market conditions) investment in cash and cash equivalents.

The Fund may invest in forwards for efficient portfolio management and/or currency hedging purposes. The Fund's use of forwards may introduce leverage into the Fund, details of which are outlined in the Fund's supplement.

You can buy and sell shares in the Fund on a weekly basis. The Fund does not pay a dividend and any investment income generated will be reinvested.

This Fund is suitable for experienced, professional investors who are prepared to accept a higher level of volatility as part of a diversified portfolio with a long-term (at least two year) investment horizon.

For full investment objective and policy details, please refer to the Fund's supplement.

Risk and Reward Profile

The Fund is categorized as a 4 due to the weekly volatility of the fund being expected to be between 5 and 10% annualized. The risk indicator was calculated using historical data and may not be a reliable indicator of the future risk profile of the Fund. The indicated risk category is not guaranteed and may shift over time. The lowest category does not mean risk-free.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

Commodities Investment Risk: Investing in commodity-linked instruments may subject the Fund to greater volatility than investments in traditional securities due to the extremely volatile nature of commodities markets.

SFI: Commodity-linked SFI involve substantial risks such as risk of loss of principal value, lack of secondary market and risk of greater volatility, with such risks not affecting traditional equity and debt securities. Commodity-linked SFI are also subject to the counterparty risk of the issuer meaning that, at the maturity of a commodity-linked SFI, the issuer may be unable to perform its obligations under the terms of the commodity-linked SFI.

Concentrated Investment Focus: The Fund may, from time to time, be exposed to the performance of a small number of commodity sectors which may result in the Fund being subject to greater volatility than if it were more broadly diversified among commodity sectors.

Commodities Regulatory Risk: Commodity-related companies are subject to significant regulation by various governmental authorities which have expressed concern regarding the derivatives markets and the need to regulate such markets. The effect of any future regulatory change is impossible to predict but could be substantial and adverse to the Fund.

Sector Risk: The commodities sector can be significantly affected by the supply of and demand for specific products and services, exploration and production spending, government regulation, world events, economic conditions, international political developments, energy conservation, the success of exploration projects, commodity prices, tax and governmental regulations. Stock prices of commodity-related companies may experience price volatility by changes in overall market movements, interest rates or factors affecting a particular industry or commodity.

Please refer to the sections entitled "Risk Factors" of both the supplement and the prospectus for additional information on these and other risk factor associated with an investment in the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out	
Charges taken from the Fund over a year	
Ongoing charges	2.0%
Charges taken from the Fund under certain specific conditions	
Performance Fee	At the end of each calendar year, 20% of the amount by which the net asset value of the Class exceeds the net asset value of the Class from the previous calendar year after which a performance fee was paid.

The entry and exit charges shown are the maximum charges you may pay. In some cases you may pay less – you can find this out from your financial advisor.

The ongoing charges figure shown is based on an estimate of the total expected charges and expenses for the first year of the Fund's operations. It excludes performance fees and portfolio transaction costs. This figure will likely vary from year to year. The exact charges will be included in the financial statements for each year.

For more information about fees and expenses, please see the ICAV's prospectus and the supplement prepared for the Fund, which are available from the Fund's administrator, Citco Fund Services (Ireland) Limited.
